SINGLE CARTRIDGE WATER FILTERS

These standard single cartridge filters have a clear transparent sump, a blue head with 3/4" female pipe thread inlet / outlet, measure 5-1/8" wide x 12-1/2" long, are adequate for a maximum of 10 gallons per minute service flow rate, and have a 125 psi pressure rating.

\$ 41.80 **PSCLP5 DIRT & RUST FILTER** This complete filter unit comes with a single WP-5 replaceable cartridge that will trap sediment down to 5 micron (.005")

\$ 3.15 **WP5 CARTRIDGE** These wound polypropylene replacement sediment cartridges are superior to the common pleated paper cartridges used in many filters. The polypropylene cord is wound around a core in a precise pattern that ensures a high efficiency rate and a high dirt loading capacity. These 9-7/8" long cartridges fit almost all standard single cartridge type filters.

\$ 2.95 **WP5 in FULL CASES of 24 CARTRIDGES**

\$ 51.75 **PSCLGAC TASTE & ODOR FILTER** This complete filter unit comes with a single GAC-10 replaceable cartridge designed to reduce or eliminate most unwanted taste & odors such as chlorine.

\$ 13.10 **GAC10 CARTRIDGE** This 9-7/8" canister style cartridge is filled with lignite based granular carbon. The water enters the cartridge from the base of the canister and must travel through the entire charcoal bed before exiting at the top. This filtration technique maximizes contact time with the carbon to insure optimal contaminant absorption.

DOUBLE CARTRIDGE WATER FILTERS

These double cartridge filters have an opaque blue sump, a black head with 3/4" female pipe thread inlet / outlet, measure 5-1/8" wide x 22-3/8" long, are adequate for a maximum of 20 gallons per minute service flow rate, and have a 125 psi pressure rating.

\$ 59.70 **PS20S1 DOUBLE DIRT & RUST FILTER** This complete filter unit comes with one EFWP520 20" sediment cartridge

\$ 2.95 **SS1 CARTRIDGE SPLICE** Allows use of two WP5 cartridges as a 20" filter

\$ 79.40 **PS20GAC DOUBLE TASTE & ODOR FILTER** This complete filter unit comes with a single GAC-20 replaceable cartridge.

\$ 28.90 **GAC20 CARTRIDGE** This 20" long canister style cartridge is filled with granular carbon - see description of GAC-10 for full details.

HIGH CAPACITY WATER FILTERS

These large diameter cartridge filters have an opaque blue sump, a black head with 1-1/2" female pipe thread inlet / outlet, measure 7-1/4" wide x 13-5/8" long, are adequate for a maximum 40 gpm service flow rate, and have a 100 psi pressure rating.

\$ 83.50 **HD15R50 HI-CAP SEDIMENT FILTER** This complete filter comes with a single R50-BBS replaceable cartridge that will trap sediment down to 50 micron (.050") Comes with a spanner wrench.

\$ 17.80 **R50BBS HI-CAP CARTRIDGE** These jumbo pleated polyester fabric cartridges are 4-1/2" diameter x 10" long.

CHLORINATORS / CHEMICAL FEED PUMPS

Chem-tech Series 100 Chemical Feed Pumps Feature: Positive displacement diaphragm style metering pump Feed range of up to 30 gallons per day Operating pressures up to 100 psi Life-time lubricated, sealed and self-maintaining gear train drive Four ball valve design for trouble free operation Strong, chemical resistant, flame retardant housing Metal reinforced, short stroke diaphragm for extra-long life Injection back pressure valve assembly allows for injection at an angle and inhibits siphoning Fully adjustable output capacity over its operating range Bleed valve assembly aids in priming and relieves pressure from discharge Both UL and CSA approved for indoor and outdoor applications Can be used effectively to feed a wide range of water treatment chemicals NSF approved **Materials of Construction** Pump Head SAN Diaphragm Hypalon Valve Seats Hypalon Gaskets Teflon Discharge Tube Polyethylene Suction Tube Flexible PVC Ball Checks Ceramic Fittings PVC

\$ 369.50 **#030115 Chem-tec 115 Volt Series #100 Chlorinator / Chemical Feed Pump** made by Pulsafeeder. Use when your water system's pump is 115 volt.

\$ 388.00 **#030230 Chem-tec 230 Volt Series #100 Chlorinator / Chemical Feed Pump** made by Pulsafeeder. Use when your water system's pump is 230 volt.

\$ 17.00 **TKT CHLORINE TEST KIT**
