ZOELLER Job Ready / Pre-Assembled Simplex Sewage Pump Package System Ready to drop it in the hole and plumb

The Zoeller #9120082 packaged sewage pump system is designed to be buried outside, to pump sewage without having to install the sewage system basin in the basement. Pre-assembled by the factory with a M264 115V 4/10ths HP sewage pump, this assembly is ready to drop into the hole and plumb. The pump is protected during shipment with peanut material that is water soluble, so they do not need removed. Connect your inlet pipe and the discharge pipe and run the power cord and float switch to the power and you are ready to pump. The basin is 18" x 30" deep and can be extended with 12" extensions by as much as 36" below the ground.

The M264 automatic sewage pump will pass 2" spherical solids and comes with a 15 foot cord. The on point is 12-1/2" and it turns off at 4-1/2"
